Clinical Educator Programme Effective Supervision Online Lecture and Workshop

Following the lecture and workshop participants will be able to 1) Describe what effective supervision looks like. How will this impact upon my practice and how will I know that it is having an impact? When will I start to take these actions? When will I review my progress? 2) Help a trainee to construct learning objectives and consider how these could be achieved and evidenced. What will I do to implement this and how will I know that it is having an impact? When will I start to take these actions? When will I review my progress? When will I start to take these actions? When will I know that it is having an impact? When will I start to take these actions? When will I review my progress? When will I review my progress? When will I start to take these actions? When will I start to take these actions? When will I review my progress? When will I review my progress? When will I start to take these actions? When will I review my progress?		<u> </u>	
When will I start to take these actions? When will I review my progress? 2) Help a trainee to construct learning objectives and consider how these could be achieved and evidenced. What will I do to implement this and how will I know that it is having an impact? When will I start to take these actions? When will I review my progress? When will I how that it is having an impact? When will I start to take these actions? When will I review my progress?	Following the lecture and workshop participants will be able to		
2) Help a trainee to construct learning objectives and consider how these could be achieved and evidenced. What will I do to implement this and how will I know that it is having an impact? When will I start to take these actions? When will I review my progress? 3) Support a trainee to be reflective in their thinking and practice What will I do to implement this in my practice and how will I know that it is having an impact? When will I review my progress? When will I review my progress? 4) Recognise the early warning signs that suggest a doctor is struggling How will this impact upon my practice and how will I know that it is having an impact?	·
